Summary

Full-Stack Developer (MERN, Next.js) who builds REST APIs, secure JWT authentication and responsive React interfaces, and deploys them on AWS. Experienced in Redis caching, background job queues and MongoDB query optimization, with an internship result of cutting API latency from 3s to 100ms.

Skills

Languages: JavaScript (ES6+)
Frontend: HTML5, CSS3, React.js, Next.js, Redux Toolkit, Tailwind CSS, Bootstrap
Backend: Node.js, Express.js, REST APIs, JWT Authentication, Mongoose
Database: MongoDB, Redis
Cloud: AWS (EC2, Auto Scaling, ALB, VPC, S3, CloudFront, IAM, Route 53, CloudWatch)
Tools & Other: Git, GitHub, Postman, VS Code, BullMQ, Cloudinary, Vercel

Experience

Full Stack Developer Intern Nov 2025 – Feb 2026
Sheryians Pvt. Ltd. *Node.js, Express.js, MongoDB, React.js, JWT, Redis, Next.js*

- Reduced API response latency from 3s to 100ms by implementing Redis caching and introducing message queues for handling low-priority tasks asynchronously.
- Developed scalable web applications using Next.js (CSR) and TanStack React Query, improving server-state handling and reducing redundant API calls through caching and background refetching.
- Designed a repository-pattern backend so the data layer can be swapped without changing business logic.
- Optimized database performance by resolving N+1 query issues using MongoDB aggregation pipelines and reference-based schema design.
- Built background workers using Node.js for asynchronous processing and strengthened API reliability through request validation and rate limiting.

Projects

Memorbit: Travel Story App | *MongoDB, Express.js, React.js, Node.js, AWS* Live | GitHub

- Built a MERN travel-story app with JWT authentication and image upload to private S3, served via signed URLs.
- Hosted the React frontend on private S3 with CloudFront (OAC, edge caching), ACM HTTPS and Route 53.
- Deployed the Node.js backend on EC2 in a private subnet of a custom VPC (2 AZs, NAT gateway) behind an ALB, using Nginx (reverse proxy) and PM2 (process management).
- Secured the backend with least-privilege IAM roles instead of access keys, SSM Parameter Store for secrets and SSM Session Manager instead of SSH.
- Configured Auto Scaling (1–2 instances, 70% CPU target) with ALB health checks, and CloudWatch alarms with SNS email alerts, tested by simulating a failure.

StreamHub: Video Streaming Platform | *React.js, Express.js, MongoDB, Cloudinary, BullMQ, Redis* Live | GitHub

- Built a full-stack video streaming platform with JWT authentication and session management.
- Offloaded video processing and email notifications to background jobs using Redis and BullMQ.
- Integrated Cloudinary with Multer for media upload, storage and optimized delivery.
- Optimized queries with MongoDB aggregation pipelines and indexing, eliminating N+1 issues.

Awards & Certifications

Full Stack Developer Internship Certificate – Sheryians Pvt. Ltd. (Jan 2026) View Certificate
Responsive Web Design – freeCodeCamp (Oct 2025) View Certificate

Education

Bachelor of Science (B.Sc.) 2021 – 2023
MVM College, Bhopal (Barkatullah University)
